Product	EPA Number	Started	Completed	Restricted Entry Interval	Safe to Enter
Roundup PowerMAX Herbicide Glyphosate as the Potassium Salt @ 5.51 lbs/gal	524-549	2018-12-12 08:45 am	2018-12-12 03:25 pm	4 h	Wednesday Dec 12, 2018 at 07:25 pm MST

### Valley Ag will,

1. Set the grower up for success by:
  - a. Planning pesticide and nutrient applications in AgWorld
  - b. Write Recommendations for pesticide and nutrient applications in AgWorld
    - i. Include REI and Worker Protection documentation on Plans and Recommendations.
2. Convert Plans or Recommendations for pesticide and nutrient applications *that are applied by Valley Agronomics* to actuals.
  - a. Email Actuals to Grower
3. If requested by the grower:
  - a. Run a Worker Protection Report
  - b. Ask AgWorld to create a google sheet that shows REI intervals that refreshes automatically.

### Grower needs to;

1. Record on farm pesticide or nutrient applications by creating application records (Actuals)
2. Access Worker Protection information and Restricted Entry Interval information:
  - a. Run a Worker Protection Report
  - b. Access Worker Protection information from actuals.
  - c. View Restricted Entry Interval Information on the Map (Web & iPad)
    - i. Red boundary = Restricted Entry Interval
    - ii. Yellow Boundary = Pre-Harvest Interval
  - d. View restricted entry intervals on automatically updating google sheet
